About Us

“**Less is more**” has been the motto of modern design. We believe that a minimalist lifestyle, more mindful life, more outdoor activities, and tiny living encourages closer family relationships.

To build sustainable homes we are using eco-labelled materials, energy-efficient systems to reduce energy consumption and the carbon footprint of our houses.

Our culturally strong relationship with wood allows us to work with the best carpenters and woodworkers of Europe. Our HQ is surrounded by unspoiled forests and it has been like this for centuries.

Our Houses

Innovative

Unique design

Affordable

Durable

Mobile & flexible

Offer conscious lifestyle

We offer standard houses, exclusive concepts, as well as prototype development.

We listen to the ideas of our clients and partners to create special tiny homes that best fit to their new environment. With 400 tiny houses behind us we are ready to guide you to your desired destination.

Tiny Zeus

Premium category. The top of the standard house range. Every detail is carefully designed. The materials are selected through substantial research.

Tiny Getaway

In a world that seems to constantly ask for more, we find peace more valuable. Living in a tiny house isn't just about downsizing, it's about upsizing living experiences. It's about waking up to the gentle rustling of leaves, finding joy in the essentials, and realizing that true richness comes from the moments we share, not the things we own. Tiny Getaway has it all.

Tiny Hogwarts

Being in this tiny house feels like bathing in light. The fact that you can watch the stars through the roof window gives you a premium, cozy feeling. Another nice feature is the aluminium covered rear and back side to contrast the wooden parts.

Tiny Juliet

The dimensions of the Tiny Juliet make it perfect for a towable tiny house, and its capacity to accommodate 4 people with a double sleeping loft. It can be ideal for a young couple with up to 2 children or it can be the perfect location of 2 couple's holiday home.

Tiny Hargita

This model is named after our favorite mountain for a good reason. Mountain Hargita is an iconic mountain range that is at the bottom of every member of the Eco Tiny House Team. Sleek and modern design incorporating all the elements of the tiny living concept. Compact and functional house for two people and their belongings.

Tiny Ladybug

Tiny Ladybug is a self-sustaining, off-grid tiny home. It offers everything that you need in order to install your house far from the bustling cities, far from the grid. A unique model that attracts attention. Out-of-the-box external cover and a warm interior where it is easy to feel home.

Tiny Rubik

This model is named after Ernő Rubik, a Hungarian genius who is the inventor of the Rubik's Cube. Our intention with the name is to express the outstanding functionality of this model. The efficient distribution of space offers experiences for an entire family. We would also like to emphasize that we wanted to make elevated experiences affordable by introducing Tiny Rubik.
